

MBDCA Versatility Title Requirements

Section I. The Mixed Breed Versatility Titles

The Mixed Breed Versatility Titles are designed to showcase the breadth of activities that MBDCA-registered dogs participate and excel in. There are three levels of Mixed Breed Versatility Titles available: **Mixed Breed Versatility (MB-V)**, **Mixed Breed Versatility Excellent (MB-VX)**, and **Mixed Breed Versatility Master (MB-VM)**. Each level of title is based primarily on the number of different categories a dog has earned titles in. Each category represents related activities such as *Obedience*, *Conformation*, or *Draft Work*, so dogs must show they are versatile by working and/or earning titles from many different types of activities.

Versatility titles are earned in the following manner:

Mixed Breed Versatility (MB-V)

The dog who earns 5 points in at least 3 different categories 1-12, or 4 points in 3 categories 1-12 *plus* 1 point in Category X shall be designated a Mixed Breed Versatility dog and may place the letters "MB-V" after its name. For each additional 5 points earned after the first 5 points, the title designation shall become **MB-V2**, **MB-V3**, **MB-V4**, etc.

Mixed Breed Versatility Excellent (MB-VX)

The dog who earns 10 points in at least 5 different categories 1-12, or 9 points in 5 categories 1-12 *plus* 1 point in Category X shall be designated a Mixed Breed Versatility Excellent dog and may place the letters "MB-VX" after its name. For each additional 10 points earned after the first 10 points, the title designation shall become **MB-VX2**, **MB-VX3**, **MB-VX4**, etc.

Mixed Breed Versatility Master (MB-VM)

The dog who earns 20 points in at least 7 different categories 1-12, or 19 points in 7 categories 1-12 *plus* 1 point in Category X shall be designated a Mixed Breed Versatility Master and may place the letters "MB-VM" after its name. For each additional 20 points earned after the first 20 points, the title designation shall become **MB-VM2**, **MB-VM3**, **MB-VM4**, etc.

Additionally, the following rules apply to all Mixed Breed Versatility Titles:

- Points do not have to be evenly distributed amongst categories provided at least one point comes from each different category used for a title.
- All points are cumulative. Points earned for the MB-V title count towards the MB-VX and MB-VM titles as well.
- Each title supercedes the previous title. After achieving enough categories for the MB-VX title, points will no longer be applied towards MB-V titles and after achieving enough categories for the MB-VM title, points will no longer be applied towards MB-VX titles. For example, a dog with an MB-V4 title with points from four categories gets a point in another category, bringing the total categories up to five. Now the dog's MB-V4 title is

replaced with an MB-VX2, for having at least 20 points in five categories and points are no longer earned towards the MB-V titles.

- There is a lifetime maximum of 1 point in Category X per dog for all versatility titles.

Section II. The Mixed Breed Versatility Categories

Section III. Hiking & Backpacking Requirements for Versatility Title Points

Mileage: The number of miles hiked or backpacked for one Versatility Title point is based on the height of the dog at the withers:

Dogs under 15"	12 miles
Dogs 15" to under 22"	16 miles
Dogs 22" and over	20 miles

Weight: Your veterinarian must be contacted before starting backpacking to assure that your dog can carry weight and to get the optimum percentage. Dogs must carry between 10% and 20% of their body weight (including the weight of the packs). Some dogs due to their size or conformation may not be good candidates to carry a backpack. In these cases we recommend earning versatility points by hiking.

Getting Points: When applying for hiking and/or backpacking points, please supply maps with your routes highlighted and include dates, mileage, and your initials. Routes may be of any distance, but be sure to keep your and your dog's fitness levels in mind when planning. The total mileage for one point does not have to be done in one outing; multiple outings may be used to accumulate miles for points.

Section IV. Draftwork Requirements for Versatility Title Points

Mileage: The number of miles of draftwork required in any one draftwork category for one Versatility Title point is based on a typical mileage that would be required to complete three races in that sport:

Bikjoring 1 dog 20 miles 2 dogs 23 miles	Carting / Driving 1 dog 15 miles 2 dogs 15 miles 4 dogs 17 miles 6 dogs 20 miles 8 dogs 23 miles	Skijoring 1 dog 23 miles 2 dogs 25 miles
Canicross 1 dog 10 miles	Dog Scootering 1 dog 15 miles 2 dogs 17 miles	Sledding 1 dog 23 miles 2 dogs 23 miles 4 dogs 25 miles 6 dogs 28 miles 8 dogs 32 miles

Weight: Your veterinarian must be contacted before starting any draftwork program to assure that your dog can pull weight and to get the optimum amount. Dogs must either pull the weight of the handler or, as in Carting and /or Sledding where the handler may be beside the vehicle, between one to two times the body weight of all dogs pulling.

Getting Points: When applying for draftwork points, please supply maps with your routes highlighted and include dates, mileage, and your initials. Routes may be of any distance, but be sure to keep your and your dog's fitness levels in mind when planning. The total mileage for one point does not have to be done in one outing; multiple outings may be used to accumulate miles for points, but all miles for one point must be in the same category of draftwork (for example, 1-dog Bikjoring or 4-dog Sledding).

Section V. Documentation Requirements for Categories 1, 12, and X

Credit for participating in any event in categories 1, 12, or X will be given upon submission of one or more of the following:

- a flyer or email stating the date and type of event
- a picture of you and/or your dog at the event
- a note signed by another person who was at the event, stating the date and type of event

All events, including past events, qualify.
